Questions while working...

- Ambitious work given the amount of sources available
- Guide with references or a reference guide? Finding the exact scope and added value of the guide
- Combining perspectives of different points of view: recognition, quality assurance, curriculum development
- The final form of the guide: assure sustainability

Next steps

- Launching of first consultation before summer: you are welcome to participate!
- Review the texts based on results consultation
- Expert seminar in October 2013 to test the guide
